Instructions for authors

The *Journal of Hard Tissue Biology* (*JHTB*) (CODEN-JHTBFF, PRINT ISSN 1341-7649, ONLINE ISSN 1880-828X) is the official journal of The Hard Tissue Biology Network Association (JHTB-Net), which is financially supported by its members.

The *Journal of Hard Tissue Biology* is abstracted/indexed in the Web of Science: Science Citation Index Expanded (SCIE), Journal Citation Reports/Science Edition, Chemical Abstracts, SciFinder, Scopus, Medical Online Library, J-STAGE [https://www.jstage.jst.go.jp/browse/jhtb/-char/ja], CiNii Research, and Japan Centra Revuo Medicina.

Aims and scope

The journal publishes high-quality basic, translational, and clinical research in the fields of hard tissue regenerative medicine, biomaterials, hard tissue biology, dentistry, oral and maxillofacial surgery, and craniofacial research, including molecular and morphological studies related to the physiology and pathology of oral and craniofacial tissues.

Editorial policy

Papers may be submitted by those not affiliated with *JHTB*, in which case, JHTB-Net asks the author for an ordinal publication fee and an extra-ordinal member fee. Submitted manuscripts should be original and not have been published or submitted elsewhere. The papers may be full-length articles or short communications. Clinical reports are considered if they describe significant and substantial new findings. In general, case reports are not acceptable. Prior consultation with the editor is recommended before preparing or submitting review articles. Responsibility lies entirely with the author for all statements contained in the paper, including bibliographic references. Manuscripts must be written in English.

Ethics

Research involving human participants must be reviewed and approved by an appropriate institutional ethics committee or Institutional Review Board (IRB), and the name of the committee and approval number must be stated in the manuscript. Studies involving human participants must be conducted in accordance with the ethical principles of the Declaration of Helsinki (latest revision). Informed consent should be obtained where required and described in the manuscript.

Animal experiments must be reviewed and approved by the appropriate institutional animal ethics committee and conducted in accordance with institutional and national guidelines for the care and use of laboratory animals. The name of the committee and approval number must be stated in the manuscript.

Manuscripts should be submitted by email to

Hatsuhiko Maeda (Editor-in-Chief)
Email: office@jhtb.jp
The *Journal of Hard Tissue Biology*/JHTB Network Association
Department of Oral Pathology/Forensic Odontology, School of Dentistry, Aichi Gakuin University, 1-100 Kusumoto-cho, Chikusa-ku, Nagoya 464-8650 Japan

Manuscripts must be prepared as follows:

The articles should be as brief as possible while still presenting the necessary information. All pages will be charged to the authors.

Consult recent issues of the journal for examples of the format to use. https://www.jstage.jst.go.jp/browse/jhtb/-char/en/

Please check your manuscript in detail, including spacing, italics, boldface, capitalization, etc.

The manuscript must be written in English and typed double spaced with 2.5 cm margins on all sides using A-4 paper size of the text file (Word file).

Please number the pages consecutively, beginning with the title page, and place the page numbers at the bottom center of each page.

Please have your English text proofread by an English language professional and submit the corresponding certificate.

1. Title Page. This page should include (a) the full title of the paper; (b) names and affiliations of the authors; (c) a short running title; and (d) the name, affiliation, address, telephone number, fax number, and email address of the corresponding author.

2. Abstract (page 2). The abstract should provide a concise description of the study and summarize its major conclusions in 300 words or fewer. It must be able to stand alone for use by abstracting services. Use full references when necessary, not citations. The abstract should be followed by 2–5 key words.

3. Text. The text should be divided into the Introduction, Materials and Methods, Results, and Discussion.

For investigations involving humans or animals, please write the official name of the ethics committee and the approval number for your research in the Materials and Methods section.

For materials, animals, machines, and software, please add product name, company name, city, and country. Please also write the correct name of the company, including "Co., Ltd.," as far as possible. When the same company name appears several times, please write only the company name after the first mention (i.e., do not write city or country thereafter).

The discussion should be brief and limited to interpretations and reasonable speculations.

Articles published in *JHTB* do not have a separate Conclusion section. If needed, please include concluding sentences at the end of the Discussion section (e.g., "In conclusion, …")

4. Abbreviations. Accepted standard abbreviations may be used. Non-standard abbreviations should be enclosed in parentheses when first used in the text. If you include the full official name and its abbreviation in the abstract, you must also define both upon first mention in the main text.

5. Footnotes. Footnotes should only be used when necessary. They should be placed on a separate page. Footnotes in a table should be placed under the table.

6. Acknowledgements. Acknowledgements to consultants, others who contributed to the study, and supporting agencies should be included here. Acknowledgements to co-authors (supervisors) are not permitted.

7. Conflict of Interest. Any conflict of interest (COI) that might interfere with the objective presentation of the research findings contained in the manuscript should be declared in a paragraph heading "COI" (after the Acknowledgment section and before the References). Examples of COI include ownership of stock in a company, commercial grants, and board membership. If there is no COI, please use the statement "The au-

Presented by Medical*Online

thors declare that no COI exists."

8. References. Each reference should include the surnames and initials of all the authors, full title of the article, journal name using standard abbreviations, volume, inclusive pages, and year of publication in the format shown below. When specifying a range of page numbers, please use the en dash. If the volume, issue, and page numbers are unknown, please provide the DOI instead of them.

Journal article

1. Missana L, Nagai N and Kuboki Y. Comparative histological studies of bone and cartilage formation induced by various BMP-carrier composites. Jpn Oral Biol 36: 9–19, 1994
2. Oz HS and Puleo DA. Animal models for periodontal disease. J Biomed Biotechnol 2011: doi: 10.115/2011/754857

If a publication is in a language other than English, please indicate the language at the end of the citation, e.g., "(in Japanese)."

Chapter in a book

Bilezikian JP. Clinical disorders of the parathyroid glands. In: Clinical Endocrinology of Calcium Metabolism, ed by Martin TJ and Raisz LG, Marcel Dekker, Inc., New York and Basel, 1978, pp 53–96.

Web references

https://********** (accessed: December 31, 2025)

At minimum, you must include the full URL and the date on which it was last accessed. Please also include any further information if known (title, and author names, etc.).

9. Figure Legends. Please provide the figure legends after the references.

10. Tables. Tables should be numbered consecutively in Arabic numerals, and tables and their titles should be submitted in an Excel file. Please do not include any tables in the text file.

11. Figures. The publisher and the Editor resolve to provide the best possible reproduction of the illustrations. To achieve this, high-quality files must be submitted.

1) Please send JPEG or TIF files for Figures.
2) For microscopic images, please include a scale bar in each photograph. The scale bar length should be indicated either within the photograph or in the figure legend.
3) The printing requires sufficient resolution. When you prepare the files of Figures with a width of 150 mm, the resolution must be 350 dpi (pixel/inch) or higher. After you prepare them, please check their quality. Please magnify your pictures, graphs, and drawings by several clicks, and then check that the picture and text are not blurred and jagged on the computer screen. (If the original data does not have a sufficiently high resolution, then Photoshop will not be able to improve the quality of the figure.) Additionally, please save images directly from original source files rather than the final files because the quality of JPEG files worsens with repeated saving.
4) If you want to print figures in black and white (B&W), please send the files saved in grayscale mode. If a figure looks B&W but its files are saved under color mode, additional cost will be required. If you want to print an image in B&W, you need to use image editing software such as "Photoshop" to change the image mode from color to grayscale.
5) When preparing the files of the figures, please make one file for each figure. For example, if Figure 1 has three parts, A, B, and C, please include all the parts in one file. Please do not create many files for a single figure.
6) Please send the files with narrow or no margin.
7) Figure titles and figure legends should appear after the references in the Word file.

Review process and revision of manuscripts

Manuscripts will be initially reviewed for appropriateness and general format by the Editorial Office. The manuscript will be fully accepted, accepted with minor changes, rejected with an invitation to resubmit after major changes, or rejected. Appeals regarding editorial decisions may be directed to the Editorial Board.

Manuscripts are sent to 2–3 specialists, who suggest whether to accept or reject the article or to return it to the author(s) for revision.

Galley proof

Authors of accepted manuscripts will receive a proof. It must be returned promptly to avoid a delay in publication. Any major changes made in the proof will require that the paper be reviewed again by the Editor and may cause a delay in publication.

If you need reprints, you can order them.
