The Journal of Japan Society for Surgical Infection
INSTRUCTIONS FOR AUTHORS

Japan Society for Surgical Infection will accept original manuscripts which contain material that has not been reported elsewhere. Authors and coauthors should be a member of this society.

Manuscript Submission and Copyright Agreement Form

The Copyright Agreement form should be submitted once your paper has been accepted for publication. Manuscripts cannot be published without this form. The corresponding author is responsible for obtaining signatures of coauthors and affirming that the manuscript is original, that all statements asserted as facts are based on author(s) careful investigation and research for accuracy, that the manuscript does not, in whole or in part, infringe any copyright or violate any law of privacy or other personal or property

right whatsoever ; that it has not been published in total or in part ; is not being submitted and/or considered for publication in total or in part elsewhere ; and that the author(s) has full authority to enter into this copyright agreement and to make the grants contained herein.

Ethical Standards

Manuscripts submitted for publication must contain a statement to the effect that all human and animal studies have been approved by the appropriate ethics committee and have therefore been performed in accordance with the ethical standards laid down in the 1964 Declaration of Helsinki and its later amendments. It should also be stated clearly in the text that all persons gave their informed consent prior to their inclusion in the study. The editors reserve the right to reject manuscripts that do not comply with the above-mentioned requirements. The author will be held responsible for false statements or failure to fulfill these requirements.

Preparation of Manuscript

Type the manuscript on white bond paper 216×279 mm (8×11 in) or ISO A4 (212×297 mm), with margins of at least 25 mm (1 in). Type only on one side of the paper. Use double spacing throughout with 12 points font, including title page, abstract, text, acknowledgements, references, tables, and legends for illustrations. Begin each of the following sections on separate pages : title page, abstract and key words, text, acknowledgements, references, individual tables, and legends.

Be prepared to submit :

- The manuscript title
- All author (s) names, valid email address and affiliations.
- Corresponding author information, including name, address, phone and fax numbers, and email address
- A structured abstract of approximately 200 words, which should be self-explanatory without reference to the text. The structured abstract should consist of Background, Methods, Results, and Conclusions.
- At the end of the paper, give the name and address of the individual to whom reprint requests should be directed.

Key words

Less than 4 key words should be listed below the abstract for indexing purposes.

Tables and Illustrations

Prepare each table with its title as a separate file. Use Arabic numerals to number tables. Each table must stand alone -i.e., contain all necessary information in the caption, and the table itself must be understood independently of the text. Details of experimental conditions should be included in the table footnotes. Information that appears in the text should not be repeated in a table, and tables should not contain data that can be given in the text in one or two sentences. In principle, color photographs are not be acceptable.

References

The Vancouver system of referencing should be used (examples are given below). In the text, references should be cited using superscript Arabic numerals in the order in which they appear. If cited in tables or figure legends, number according to the first identification of the table or figure in the text.

Names of journals should be abbreviated in the style used in Index Medicus .

Authors are responsible for the accuracy of the references.

Journal papers : Ko ST, Airan MC. Technique and early experience of laparoscopic cholecystectomy and cholangiogram. Surg Endosc 1990 ; 4 : 58-59.

Books : Cuschieri A, Bouchier IAD. The biliary tract. In : Cuschieri A, Giles GR, and Moossa AR, eds. Essential Surgical Practice. London : Wright Publishers, 1988 : 1051-1056.

When a citation has more than four authors, list the first three and use "et al." If it is necessary to cite an abstract, this should be designated. Abbreviations of journal titles should follow MEDLINE. Authors are responsible for the accuracy of the reference, and are reminded that inaccurate references are highly frustrating to the reader, the cited author, and indexing services. Within the text, citations should be identified by numbers in brackets, and the list of references at the end of the paper should be numbered by order of citation. Ensure that issue numbers are omitted from the reference citation. Only works referred to in the text and already accepted for publication can be included.

The regulation of the number of pages of the paper and the number of words of the abstract

Type of article	Text	Table and Figure	Abstract	Key word	Total pages	COI
Review article	30 pages	10 pieces	200 words	4 words	8 pages	necessary
